Vulcan Materials Center Dedicated

The Vulcan Materials Center for Environmental Stewardship and Education at Samford, dedicated Oct. 10, supports academic programs, research, seminars and other activities in environmental studies.

Housed in the Sciencenter, the facility was funded by a $310,000 grant from Vulcan Materials Company, headquartered in Birmingham. The grant also provides money for a visiting summer scholars program, a speaker series and program personnel.

Speaking at the dedication, Lynn Scarlett, assistant secretary of policy, management and budget, U.S. Department of the Interior, called on businesses and customers to make conservation of natural resources a high priority. "It's all about reducing our environmental footprint," she said.

Vulcan, the nation's largest producer of construction aggregates, such as crushed sand, stone and gravel, helped fund Samford's master of science in environmental management program in 1993.

"Vulcan is a company whose leadership has had a strong tradition of sensitivity to environmental concerns," said Samford President Thomas E. Corts. ■

Samford Gets $2 Million Lilly Grant for Pastoral Programs

Samford University received a $2 million grant from Lilly Endowment, Inc. of Indianapolis, Ind., to take part in a national program called "Sustaining Pastoral Excellence." Samford will use the grant to establish a Resource Center for Pastoral Excellence that will encourage spiritual, physical, social and intellectual renewal among church leaders.

"The project will directly support approximately 300 pastors during the five-year grant period," said Dr. Penny L. Marler, project director. "Its wider impact will extend to these pastors' families, congregations, colleagues and communities."

The renewal process for church leaders will be accomplished through sabbatical leaves, pastor support groups, ministerial apprenticeships and creative interracial partnering, said Marler.

The work of the center will be structured to enable pastors to sustain their own growth and

Newton Scholar Rouse to Speak Nov. 12

John Newton is best known as the author of "Amazing Grace." His participation in the slave trade and his immoral life are echoed in his reference to "a wretch like me." He wrote widely after his conversion to Christianity, but most know him for the famous hymn.

British scholar Marylynn Rouse has researched Newton's writings for many years. She soon will publish his collected works. Rouse will speak at Samford Tuesday, Nov. 12, at 7 p.m. in Brooks Auditorium.

Among the notes emerging through Rouse's study is Newton's influence on William Wilberforce, who championed antislavery in England. Parliament passed a law outlawing the slave trade in 1807—some 58 years before the U. S. ratified the 13th Amendment. ■

Worth Watching

The Leonid Meteor Storm will peak at about 4:30 a.m. Tuesday, Nov. 19, as 40 meteors per minute slam into the Earth's atmosphere at 159,000 miles per hour.

This will produce an astronomical event not to be equaled until 2033, planetarium director George Atchley reports.

These meteors are left over from the Tempel-Tuttle comet that visited this solar system in 1866.

Start watching no later than 4 a.m. to allow your eyes to adjust to the dark, Atchley suggests. ■
