May 19, 2023

Dr. J. Michael Hardin Provost and Vice President Samford University 800 Lakeshore Drive Birmingham, AL 35229

Via Email

Dear Dr. Hardin:

The Master of Architecture program at Samford University's application for initial candidacy, including the Visiting Team Report (VTR), was reviewed during the April 2023 Board of Directors meeting of the National Architectural Accrediting Board (NAAB).

Based on the following review of the program, the NAAB Directors voted to grant the Master of Architecture program a two-year term of initial candidacy effective January 1, 2022, and require the program to address the following:

## Conditions not yet met or in progress:

- 2 Shared Values
- PC.1 Career Paths
- PC.2 Design
- PC.3 Eco. Knowledge and Responsibility
- PC.4 History and Theory
- PC.5 Research and Innovation
- PC.6 Leadership and Collaboration
- PC.7 Learning and Teaching Culture
- PC.8 Social Equity and Inclusion
- SC.1 Health, Safety, and Welfare in the Built Environment
- SC.2 Professional Practice
- SC.3 Regulatory Context
- SC.4 Technical Knowledge
- SC.5 Design Synthesis
- SC.6 Building Integration
- 4.2 Professional Degrees and Curriculum
- 5.1 Structure and Governance
- 5.2 Planning and Assessment
- 5.3 Curriculum Development
- 5.4 Human Resources and Human Resource Development
- 5.5 Social Equity, Diversity, and Inclusion
- 5.6 Physical Resources
- 5.8 Information Resources
- 6.5 Admissions and Advising
- 6.6 Student Financial Reporting

#### **Conditions not met:**

• 6.4 Public Access to Accreditation Reporting

These conditions will be addressed in the next APR. The program is required to apply for continuation of candidacy or initial accreditation and host a visit in 2024. The program must achieve initial accreditation within six

years of the effective date of the term of initial candidacy. Subsequent visits will be conducted under the Conditions and Procedures in effect at the time of the visit.

## **Program Review**

#### 1—Context and Mission

To help the NAAB and the visiting team understand the specific circumstances of the school, the program must describe the following:

- The institutional context and geographic setting (public or private, urban or rural, size, etc.), and how the
  program's mission and culture influence its architecture pedagogy and impact its development. Programs
  that exist within a larger educational institution must also describe the mission of the college or university
  and how that shapes or influences the program.
- The program's role in and relationship to its academic context and university community, including how
  the program benefits—and benefits from—its institutional setting and how the program as a unit and/or its
  individual faculty members participate in university-wide initiatives and the university's academic plan.
  Also describe how the program, as a unit, develops multidisciplinary relationships and leverages unique
  opportunities in the institution and the community.
- The ways in which the program encourages students and faculty to learn both inside and outside the
  classroom through individual and collective opportunities (e.g., field trips, participation in professional
  societies and organizations, honor societies, and other program-specific or campus-wide and communitywide activities).

This Condition is met. The program provided sufficient information to meet the requirements of this Condition. The program provided evidence of its context and strong relationship with the Interior Design program along with its mission to strive for an accelerated program to reduce cost and prepare students for collaboration after graduation.

## 2—Shared Values of the Discipline and Profession

The program must report on how it responds to the following values, all of which affect the education and development of architects. The response to each value must also identify how the program will continue to address these values as part of its long-range planning. These values are foundational, not exhaustive.

**Design**: Architects design better, safer, more equitable, resilient, and sustainable built environments. Design thinking and integrated design solutions are hallmarks of architecture education, the discipline, and the profession.

- Environmental Stewardship and Professional Responsibility: Architects are responsible for the
  impact of their work on the natural world and on public health, safety, and welfare. As professionals and
  designers of the built environment, we embrace these responsibilities and act ethically to accomplish
  them.
- **Equity, Diversity, and Inclusion**: Architects commit to equity and inclusion in the environments we design, the policies we adopt, the words we speak, the actions we take, and the respectful learning, teaching, and working environments we create. Architects seek fairness, diversity, and social justice in the profession and in society and support a range of pathways for students seeking access to an architecture education.
- Knowledge and Innovation: Architects create and disseminate knowledge focused on design and the
  built environment in response to ever-changing conditions. New knowledge advances architecture as a
  cultural force, drives innovation, and prompts the continuous improvement of the discipline.

- Leadership, Collaboration, and Community Engagement: Architects practice design as a
  collaborative, inclusive, creative, and empathetic enterprise with other disciplines, the communities we
  serve, and the clients for whom we work.
- Lifelong Learning: Architects value educational breadth and depth, including a thorough understanding
  of the discipline's body of knowledge, histories and theories, and architecture's role in cultural, social,
  environmental, economic, and built contexts. The practice of architecture demands lifelong learning,
  which is a shared responsibility between academic and practice settings.

This Condition is not yet met. The program provided evidence of the outlined six shared values, including: design influence from the Interior Design program, values related to environmental stewardship, development for underserved communities' outreach, opportunities for interdisciplinary knowledge with allied fields, intentions to develop connections with the School of Arts, and intentions to support lifelong learning, but needs to provide evidence of how its plans are implemented and are part of its long range planning.

## 3—Program and Student Criteria

These criteria seek to evaluate the outcomes of architecture programs and student work within their unique institutional, regional, national, international, and professional contexts, while encouraging innovative approaches to architecture education and professional preparation.

## 3.1 Program Criteria (PC)

A program must demonstrate how its curriculum, structure, and other experiences address the following criteria.

**PC.1 Career Paths**—How the program ensures that students understand the paths to becoming licensed as an architect in the United States and the range of available career opportunities that utilize the discipline's skills and knowledge.

This criterion is not yet met. The program provided evidence of [two intro classes that have been offered, SOA 101 & ARCH 101], but needs to provide evidence of [how the program ensures that students understand professional licensure requirements, such as AXP and ARE requirements as well as other available career paths.

**PC.2 Design**—How the program instills in students the role of the design process in shaping the built environment and conveys the methods by which design processes integrate multiple factors, in different settings and scales of development, from buildings to cities.

This criterion is not yet met. The program provided evidence of its plans for future coursework but needs to provide evidence of how those planned courses are finalized, as well as the results of the assessment of student learning and continuous improvement plans related to the assessment results.

**PC.3 Ecological Knowledge and Responsibility**—How the program instills in students a holistic understanding of the dynamic between built and natural environments, enabling future architects to mitigate climate change responsibly by leveraging ecological, advanced building performance, adaptation, and resilience principles in their work and advocacy activities.

This criterion is not yet met. The program provided evidence of some aspects of SC.3 but needs to provide evidence of outcomes-based assessments for life safety, land use, and US building and site laws and regulation.

**PC.4 History and Theory**—How the program ensures that students understand the histories and theories of architecture and urbanism, framed by diverse social, cultural, economic, and political forces, nationally and globally.

This criterion is not yet met. The program provided evidence of its plans for future coursework but needs to provide evidence of how those planned courses are finalized, as well as the results of the assessment of student learning and continuous improvement plans related to the assessment results.

**PC.5 Research and Innovation**—How the program prepares students to engage and participate in architectural research to test and evaluate innovations in the field.

This criterion is not yet met. The program provided evidence of future courses (SOA 460, ARCH 510 & ARCH 610) intended to research programing and research in preparation for thesis but needs to provide evidence of how the program prepares students for research and innovation once courses are offered.

**PC.6 Leadership and Collaboration**—How the program ensures that students understand approaches to leadership in multidisciplinary teams, diverse stakeholder constituents, and dynamic physical and social contexts, and learn how to apply effective collaboration skills to solve complex problems.

This criterion is not yet met. The program provided evidence of its plans for future coursework but needs to provide evidence of how those planned courses are finalized, as well as the results of the assessment of student learning and continuous improvement plans related to the assessment results.

**PC.7 Learning and Teaching Culture**—How the program fosters and ensures a positive and respectful environment that encourages optimism, respect, sharing, engagement, and innovation among its faculty, students, administration, and staff.

This criterion is not yet met. The program provided evidence of plans to create a Learning and Teaching Culture policy during the AY 2022-23 but needs to provide evidence of implementation of the planned policy including how the program fosters and ensures a positive and respectful environment among its faculty, students, administration, and staff.

**PC.8 Social Equity and Inclusion**—How the program furthers and deepens students' understanding of diverse cultural and social contexts and helps them translate that understanding into built environments that equitably support and include people of different backgrounds, resources, and abilities.

This criterion is not yet met. The program provided evidence of its plans for future coursework but needs to provide evidence of how those planned courses are finalized, as well as the results of the assessment of student learning and continuous improvement plans related to the assessment results.

## 3.2 Student Criteria (SC)

A program must demonstrate how it addresses the following criteria through program curricula and other experiences, with an emphasis on the articulation of learning objectives and assessment.

**SC.1 Health, Safety, and Welfare in the Built Environment**—How the program ensures that students understand the impact of the built environment on human health, safety, and welfare at multiple scales, from buildings to cities.

This criterion is not yet met. The program provided evidence of course descriptions of building systems, design studio and a senior project but needs to provide evidence of the program's approach to ensure student's understanding of the impact of the built environment in human health, safety and welfare; along with, the assessment methods, benchmarks to assess criterion achievement and examples of changes implemented in response to the assessment.

**SC.2 Professional Practice**—How the program ensures that students understand professional ethics, the regulatory requirements, the fundamental business processes relevant to architecture practice in the United States, and the forces influencing change in these subjects.

This criterion is not yet met. The program provided evidence of a series of three professional practice courses but needs to provide evidence of the courses' implementation and how the program ensures students' understanding of professional ethics, regulatory requirements and the business practice along with the assessment methods, benchmarks to assess criterion achievement and examples of changes implemented in response to the assessment.

**SC.3 Regulatory Context**—How the program ensures that students understand the fundamental principles of life safety, land use, and current laws and regulations that apply to buildings and sites in the United States, and the evaluative process architects use to comply with those laws and regulations as part of a project.

This criterion is not yet met. The program provided evidence of future course descriptions including ARCH 505 – Internship but needs to provide evidence of [the implementation of described coursed and how the program ensures student's understanding of life safety, land use, laws and regulations and how the process to comply; along with the assessment methods, benchmarks to assess criterion achievement and examples of changes implemented in response to the assessment.

**SC.4 Technical Knowledge**—How the program ensures that students understand the established and emerging systems, technologies, and assemblies of building construction, and the methods and criteria architects use to assess those technologies against the design, economics, and performance objectives of projects.

This criterion is not met. The program provided evidence of future course descriptions; including drawing, building systems, structures, and materials & methods but needs to provide evidence of implementation of described courses and student's understanding of how architects use this condition against the design, economics and performance objectives; along with the assessment methods, benchmarks to assess criterion achievement and examples of changes implemented in response to the assessment.

**SC.5 Design Synthesis**—How the program ensures that students develop the ability to make design decisions within architectural projects while demonstrating synthesis of user requirements, regulatory requirements, site conditions, and accessible design, and consideration of the measurable environmental impacts of their design decisions.

This criterion is not yet met. The program provided evidence of course descriptions to be offered in the future but needs to provide evidence of implementation of said courses and student's ability to make decisions while synthesizing; user and regulatory requirements, site conditions, accessible design, and consideration of the measurable environment impacts of their design decisions along with the assessment methods, benchmarks to assess criterion achievement and examples of changes implemented in response to the assessment.

**SC.6 Building Integration**—How the program ensures that students develop the ability to make design decisions within architectural projects while demonstrating integration of building envelope systems and assemblies, structural systems, environmental control systems, life safety systems, and the measurable outcomes of building performance.

This criterion is not yet met. The program provided evidence of course descriptions to be offered in the future but needs to provide evidence of [implementation of said courses and students' ability to make decisions while demonstrating integration of building systems and assemblies, structural, environmental control, life safety systems and the measurable outcome of the building performance along with the assessment methods, benchmarks to assess criterion achievement and examples of changes implemented in response to the assessment.

## 4—Curricular Framework

This condition addresses the institution's regional accreditation and the program's degree nomenclature, credithour and curricular requirements, and the process used to evaluate student preparatory work.

#### 4.1 Institutional Accreditation

For the NAAB to accredit a professional degree program in architecture, the program must be, or be part of, an institution accredited by one of the following U.S. regional institutional accrediting agencies for higher education:

- Southern Association of Colleges and Schools Commission on Colleges (SACSCOC)
- Middle States Commission on Higher Education (MSCHE)
- New England Commission of Higher Education (NECHE)
- Higher Learning Commission (HLC)
- Northwest Commission on Colleges and Universities (NWCCU)
- WASC Senior College and University Commission (WSCUC)

This Condition is met. The program provided sufficient information to meet the requirements of this Condition. The program provided evidence of its accreditation through SACSCOC, verified on the program's website.

## 4.2 Professional Degrees and Curriculum

The NAAB accredits professional degree programs with the following titles: the Bachelor of Architecture (B.Arch.), the Master of Architecture (M.Arch.), and the Doctor of Architecture (D.Arch.). The curricular requirements for awarding these degrees must include professional studies, general studies, and optional studies.

- 4.2.1 Professional Studies. Courses with architectural content required of all students in the NAAB-accredited program are the core of a professional degree program that leads to licensure. Knowledge from these courses is used to satisfy Condition 3—Program and Student Criteria. The degree program has the flexibility to add additional professional studies courses to address its mission or institutional context. In its documentation, the program must clearly indicate which professional courses are required for all students.
- 4.2.2 General Studies. An important component of architecture education, general studies provide basic knowledge and methodologies of the humanities, fine arts, mathematics, natural sciences, and social sciences. Programs must document how students earning an accredited degree achieve a broad, interdisciplinary understanding of human knowledge.
  - In most cases, the general studies requirement can be satisfied by the general education program of an institution's baccalaureate degree. Graduate programs must describe and document the criteria and process used to evaluate applicants' prior academic experience relative to this requirement. Programs accepting transfers from other institutions must document the criteria and process used to ensure that the general education requirement was covered at another institution.
- 4.2.3 Optional Studies. All professional degree programs must provide sufficient flexibility in the curriculum to allow students to develop additional expertise, either by taking additional courses offered in other academic units or departments, or by taking courses offered within the department offering the accredited program but outside the required professional studies curriculum. These courses may be configured in a variety of curricular structures, including elective offerings, concentrations, certificate programs, and minors.

NAAB-accredited professional degree programs have the exclusive right to use the B.Arch., M.Arch., and/or D.Arch. titles, which are recognized by the public as accredited degrees and therefore may not be used by non-accredited programs.

The number of credit hours for each degree is outlined below. All accredited programs must conform to minimum credit-hour requirements established by the institution's regional accreditor.

- 4.2.1 Bachelor of Architecture. The B.Arch. degree consists of a minimum of 150 semester credit hours, or the quarter-hour equivalent, in academic coursework in general studies, professional studies, and optional studies, all of which are delivered or accounted for (either by transfer or articulation) by the institution that will grant the degree. Programs must document the required professional studies courses (course numbers, titles, and credits), the elective professional studies courses (course numbers, titles, and credits), the required number of credits for general studies and for optional studies, and the total number of credits for the degree.
- 4.2.2 Master of Architecture. The M.Arch. degree consists of a minimum of 168 semester credit hours, or the quarter-hour equivalent, of combined undergraduate coursework and a minimum of 30 semester credits of graduate coursework. Programs must document the required professional studies classes (course numbers, titles, and credits), the elective professional studies classes (course numbers, titles, and credits), the required number of credits for general studies and for optional studies, and the total number of credits for both the undergraduate and graduate degrees.
- 4.2.3 Doctor of Architecture. The D.Arch. degree consists of a minimum of 210 credits, or the quarter-hour equivalent, of combined undergraduate and graduate coursework. The D.Arch. requires a minimum of 90 graduate-level semester credit hours, or the graduate-level 135 quarter-hour equivalent, in academic coursework in professional studies and optional studies. Programs must document, for both undergraduate and graduate degrees, the required professional studies classes (course numbers, titles, and credits), the elective professional studies classes (course numbers, titles, and credits), the required number of credits for general studies and for optional studies, and the total number of credits for the degree.

This Condition is not yet met. The program provided evidence of course descriptions but needs to provide evidence of the implementation of said courses.

#### 4.3 Evaluation of Preparatory Education

The NAAB recognizes that students transferring to an undergraduate accredited program or entering a graduate accredited program come from different types of programs and have different needs, aptitudes, and knowledge bases. In this condition, a program must demonstrate that it utilizes a thorough and equitable process to evaluate incoming students and that it documents the accreditation criteria it expects students to have met in their education experiences in non-accredited programs.

- 4.3.1 A program must document its process for evaluating a student's prior academic coursework related to satisfying NAAB accreditation criteria when it admits a student to the professional degree program.
- 4.3.2 In the event a program relies on the preparatory education experience to ensure that admitted students have met certain accreditation criteria, the program must demonstrate it has established standards for ensuring these accreditation criteria are met and for determining whether any gaps exist.
- 4.3.3 A program must demonstrate that it has clearly articulated the evaluation of baccalaureate-degree or associate-degree content in the admissions process, and that a candidate understands the evaluation process and its implications for the length of a professional degree program before accepting an offer of admission.

This Condition is met. The program provided sufficient information to meet the requirements of this Condition. The program provided evidence of that is does not accept transfer students in the M.Arch. program. Should the program change the policy, additional evidence will be required.

## 5—Resources

## 5.1 Structure and Governance

The program must describe the administrative and governance processes that provide for organizational continuity, clarity, and fairness and allow for improvement and change.

- 5.1.1 **Administrative Structure**: Describe the administrative structure and identify key personnel in the program and school, college, and institution.
- 5.1.2 **Governance**: Describe the role of faculty, staff, and students in both program and institutional governance structures and how these structures relate to the governance structures of the academic unit and the institution.

This Condition is not yet met. The program provided evidence of its administrative and governance structures but needs to provide evidence of the role of students in program and institutional governance structures and how these structures relate to the governance structures of the academic unit.

## 5.2 Planning and Assessment

The program must demonstrate that it has a planning process for continuous improvement that identifies:

- 5.2.1 The program's multiyear strategic objectives, including the requirement to meet the NAAB Conditions, as part of the larger institutional strategic planning and assessment efforts.
- 5.2.2 Key performance indicators used by the unit and the institution.
- 5.2.3 How well the program is progressing toward its mission and stated multiyear objectives.
- 5.2.4 Strengths, challenges, and opportunities faced by the program as it strives to continuously improve learning outcomes and opportunities.
- 5.2.5 Ongoing outside input from others, including practitioners.

The program must also demonstrate that it regularly uses the results of self-assessments to advise and encourage changes and adjustments that promote student and faculty success.

This Condition is not yet met. The program provided evidence of 13 program goals and assessments to which SLOs have been mapped. The program also provided evidence of its KPIs, its strengths, opportunities, and challenges as well as plans for advisory board and local practitioner involvement with the program. The program must also provide updates related to progress to the mission, (5.2.3). In addition, the program is missing evidence that its long-multi-year objectives relate to the requirement to meet the NAAB conditions as part of larger planning and assessment efforts (5.2.1).

#### 5.3 Curricular Development

The program must demonstrate a well-reasoned process for assessing its curriculum and making adjustments based on the outcome of the assessment. The program must identify:

- 5.3.1 The relationship between course assessment and curricular development, including NAAB program and student criteria.
- 5.3.2 The roles and responsibilities of the personnel and committees involved in setting curricular agendas and initiatives, including the curriculum committee, program coordinators, and department chairs or directors.

This Condition is not yet met. The program provided evidence of course assessment and a collaborative process for setting the curriculum among the faculty and the university wide curriculum committee but needs to provide evidence of curriculum implementation.

## 5.4 Human Resources and Human Resource Development

The program must demonstrate that it has appropriate and adequately funded human resources to support student learning and achievement. Human resources include full- and part-time instructional faculty, administrative leadership, and technical, administrative, and other support staff. The program must:

- 5.4.1 Demonstrate that it balances the workloads of all faculty in a way that promotes student and faculty achievement.
- 5.4.2 Demonstrate that it has an Architect Licensing Advisor who is actively performing the duties defined in the NCARB position description. These duties include attending the biannual NCARB Licensing Advisor Summit and/or other training opportunities to stay up-to-date on the requirements for licensure and ensure that students have resources to make informed decisions on their path to licensure.
- 5.4.3 Demonstrate that faculty and staff have opportunities to pursue professional development that contributes to program improvement.
- 5.4.4 Describe the support services available to students in the program, including but not limited to academic and personal advising, mental well-being, career guidance, internship, and job placement.

This Condition is not yet met. The program provided evidence of a process to manage and develop its human resources and human resource development but needs to provide evidence of its implementation.

## 5.5 Social Equity, Diversity, and Inclusion

The program must demonstrate its commitment to diversity and inclusion among current and prospective faculty, staff, and students. The program must:

- 5.5.1 Describe how this commitment is reflected in the distribution of its human, physical, and financial resources.
- 5.5.2 Describe its plan for maintaining or increasing the diversity of its faculty and staff since the last accreditation cycle, how it has implemented the plan, and what it intends to do during the next accreditation cycle. Also, compare the program's faculty and staff demographics with that of the program's students and other benchmarks the program deems relevant.
- 5.5.3 Describe its plan for maintaining or increasing the diversity of its students since the last accreditation cycle, how it has implemented the plan, and what it intends to do during the next accreditation cycle. Also, compare the program's student demographics with that of the institution and other benchmarks the program deems relevant.
- 5.5.4 Document what institutional, college, or program policies are in place to further Equal Employment Opportunity/Affirmative Action (EEO/AA), as well as any other social equity, diversity, and inclusion initiatives at the program, college, or institutional level.
- 5.5.5 Describe the resources and procedures in place to provide adaptive environments and effective strategies to support faculty, staff, and students with different physical and/or mental abilities.

This Condition is not yet met. The program provided evidence of 5.5.1 in institutional policies and procedures as well as an institutional commitment to diversity and inclusion. The program must provide evidence of the program's commitment to the same. In addition, the program must provide evidence of a program level plan addressing faculty and staff diversity for the next accreditation cycle, as well as results from current plan (5.5.2) Finally, the program must provide a described plan for maintaining or increasing diversity of students for next accreditation cycle and results from current plan (5.5.3)

## 5.6 Physical Resources

The program must describe its physical resources and demonstrate how they safely and equitably support the program's pedagogical approach and student and faculty achievement. Physical resources include but are not limited to the following:

- 5.6.1 Space to support and encourage studio-based learning.
- 5.6.2 Space to support and encourage didactic and interactive learning, including lecture halls, seminar spaces, small group study rooms, labs, shops, and equipment.
- 5.6.3 Space to support and encourage the full range of faculty roles and responsibilities, including preparation for teaching, research, mentoring, and student advising.
- 5.6.4 Resources to support all learning formats and pedagogies in use by the program.

If the program's pedagogy does not require some or all of the above physical resources, the program must describe the effect (if any) that online, off-site, or hybrid formats have on digital and physical resources.

This Condition is not yet met. The program provided evidence of space to support the program's pedagogical approach at the current student population. The program must provide evidence of spaces that will support student and faculty achievement that are responsive to the forecasted population growth for the next year.

## 5.7 Financial Resources

The program must demonstrate that it has the appropriate institutional support and financial resources to support student learning and achievement during the next term of accreditation.

This Condition is met. The program provided sufficient information to meet the requirements of this Condition. The program provided evidence of institutional financial resources to support the program. The program should reference the guidelines to ensure the evidence provided covers all expected elements.

#### 5.8 Information Resources

The program must demonstrate that all students, faculty, and staff have convenient and equitable access to architecture literature and information, as well as appropriate visual and digital resources that support professional education in architecture.

Further, the program must demonstrate that all students, faculty, and staff have access to architecture librarians and visual resource professionals who provide discipline-relevant information services that support teaching and research.

This Condition is not yet met. The program provided evidence of its current collection and plans to increase the information resources to meet the needs of the program. The program must also provide evidence of the implementation of these plans.

## 6—Public Information

The NAAB expects accredited degree programs to provide information to the public about accreditation activities and the relationship between the program and the NAAB, admissions and advising, and career information, as well as accurate public information about accredited and non-accredited architecture programs. The NAAB expects programs to be transparent and accountable in the information provided to students, faculty, and the public. As a result, all NAAB-accredited programs are required to ensure that the following information is posted online and is easily available to the public.

## 6.1 Statement on NAAB-Accredited Degrees

All institutions offering a NAAB-accredited degree program or any candidacy program must include the *exact language* found in the NAAB *Conditions for Accreditation*, 2020 Edition, Appendix 2, in catalogs and promotional media, including the program's website.

This Condition is met. The program provided sufficient information to meet the requirements of this Condition. The program provided evidence of the required statement on the website.

#### 6.2 Access to NAAB Conditions and Procedures

The program must make the following documents available to all students, faculty, and the public, via the program's website:

- a) Conditions for Accreditation, 2020 Edition
- b) Conditions for Accreditation in effect at the time of the last visit (2009 or 2014, depending on the date of the last visit)
- c) Procedures for Accreditation, 2020 Edition
- d) Procedures for Accreditation in effect at the time of the last visit (2012 or 2015, depending on the date of the last visit)

This Condition is met. The program provided sufficient information to meet the requirements of this Condition. The program provided evidence of access to the required documents on the program website.

## 6.3 Access to Career Development Information

The program must demonstrate that students and graduates have access to career development and placement services that help them develop, evaluate, and implement career, education, and employment plans.

This Condition is met. The program provided sufficient information to meet the requirements of this Condition. The program provided evidence of access to career development and placement services including the ALA and internship coordinator.

## 6.4 Public Access to Accreditation Reports and Related Documents

To promote transparency in the process of accreditation in architecture education, the program must make the following documents available to all students, faculty, and the public, via the program's website:

- All Interim Progress Reports and narratives of Program Annual Reports submitted since the last team visit
- b) All NAAB responses to any Plan to Correct and any NAAB responses to the Program Annual Reports since the last team visit
- c) The most recent decision letter from the NAAB
- d) The Architecture Program Report submitted for the last visit
- e) The final edition of the most recent Visiting Team Report, including attachments and addenda
- f) The program's optional response to the Visiting Team Report
- g) Plan to Correct (if applicable)
- h) NCARB ARE pass rates
- i) Statements and/or policies on learning and teaching culture
- j) Statements and/or policies on diversity, equity, and inclusion

This Condition is not met. The program did not provide sufficient information to meet the requirements of this Condition. As the program has enrolled students in an architecture program, the program needs to provide evidence of that has a policy on teaching and learning culture that it has made available to students, faculty and the public via the program's website.

## 6.5 Admissions and Advising

The program must publicly document all policies and procedures that govern the evaluation of applicants for admission to the accredited program. These procedures must include first-time, first-year students as well as transfers from within and outside the institution. This documentation must include the following:

- a) Application forms and instructions
- b) Admissions requirements: admissions-decisions procedures, including policies and processes for evaluation of transcripts and portfolios (when required); and decisions regarding remediation and advanced standing
- c) Forms and a description of the process for evaluating the content of a non-accredited degrees
- d) Requirements and forms for applying for financial aid and scholarships
- e) Explanation of how student diversity goals affect admission procedures

This Condition is not yet met. The program provided evidence of overall admissions requirements but needs to provide evidence of application forms and instructions, admissions decisions and procedures, forms and a description of the process for evaluating the content of a non-accredited degree (BS from Sanford), requirements, and an explanation of how student diversity goals affect admission procedures.

#### 6.6 Student Financial Information

- 6.6.1 The program must demonstrate that students have access to current resources and advice for making decisions about financial aid.
- 6.6.2 The program must demonstrate that students have access to an initial estimate for all tuition, fees, books, general supplies, and specialized materials that may be required during the full course of study for completing the NAAB-accredited degree program.

This Condition is not yet met. The program provided evidence that students have access to resources and advice regarding financial aid and some costs. The program needs to provide evidence that students have access to an initial estimate for books, general supplies, and specialized materials that may be required during the full course of study for completing the NAAB-accredited degree program.

Listed below are the required program documents and due dates:

Document Due	Date Due
Program Annual Report	Does not apply for programs in candidacy.
APR	180 days prior to fall 2024 site visit

Please note public dissemination of the Architecture Program Report (APR) and the Visiting Team Report (VTR) is a condition of accreditation. These documents must be made public on the program's website in their entirety (Condition 6.4, 2020 *Conditions for Accreditation* and pp.15-16 of the 2020 *Procedures for Accreditation*).

Please feel free to contact us with any questions at <a href="mailto:accreditation@naab.org">accreditation@naab.org</a>.

# MAB

On behalf of NAAB and the visiting team, thank you for your support of accreditation in architecture education.

Sincerely,

David L. Hoffman, FAIA, NCARB

President
