How to Check Your Open Purchase Orders and Their Current Balance

FPIOPOF (Open Purchase Orders by FOAPAL)

You can enter your INDEX or FOAPAL stream here and see all open POs. This will NOT show the PO balance; only that the PO is open and provides the quantity and unit price ordered. You can export to Excel by going to Help ---Extract Data No Key.

FGIENCD (Detail Encumbrance Activity)

This will show all activity on an individual PO and whether the PO is open (O) or closed(C).
ARGOS Report Open_POs_by_ORGN.Open POs by Orgn Report

This is much like the FPIOPOF report above.

You can choose to see it in report format or Excel.
